

Proven Design, Self-Closing, Self-Stopping

The FabEnCo safety gate is a self-closing and self-stopping gate that is durable, economical, reliable, easy to install, and the stop angle can be adjusted up to 90 degrees.

The gates are available in carbon steel, aluminum, and stainless steel. FabEnCo Self-Closing Safety Gates eliminate the time and expense of fabricating gates that provide fall protection at ladder, platform, mezzanine and stair openings.

These self-closing safety gates will dramatically increase the safety of your employees. Force tested up to 300 lbs., the FabEnCo safety gates are easy to pass through and eliminate the need to stop and lift a bar or undo a chain. Installation is very simple requiring only 10 to 15 minutes of your time using simple hand tools. There's no cutting, welding, or drilling necessary.

For very large openings, 2 gates can be used and the self-stopping feature allows them to be adjusted to meet in the middle of the opening.

Features

- Easy to install - in most cases, gates can be installed in 10 to 15 minutes using simple hand tools
- Versatile - can be installed on either side of the handrail, left or right opening.
- Adjustable - can be adjusted to fit a variety of openings.
- Adaptable - mounts on all types of handrails (channel, angle, flatbar, pipe).
- Custom Stainless Steel Spring - returns gate after each passage.
- Positive Stop - positive stop without handrail contact.
- FabEnCoat Finishes - a variety of finishes are available including galvanized, safety yellow powder coated, or stainless steel.
- A Series, XL Series, R Series, and Z series mount left or right. Other gates must be specified for opening side.
- Gates can be installed on all types of handrails including angle, flatbar, pipe, or existing walls.
