

# KWIK-RAIL MODULAR RAIL SYSTEM

## A Modular Guardrail System that is Easy to Install

Kwik-Rail is a metal safety handrail system that is easy to install and can be custom fit on-site to suit the application. It is a safety handrail that is easily assembled with just a hex key. Creates a tough and durable barrier in just minutes with no welding.

The Kwik-Rail system is designed to be modular and is available for infinite customization with KwikFit Structural Pipe Fittings. The pipe couplers are made of malleable iron and are designed to make the building of handrails and pipe structures fast and easy. Aluminum pipe and fittings are also available. Using only simple hand tools, complex structural pipe fitting configurations can be produced quickly and efficiently. Trust W.S. Safety to design and install BlueWater Mfg KwikRail system with structural pipe fittings.

Kwik-Rail is available in kit form; however, custom lengths of pipes and fittings can be ordered. Rails can also be cut, pre-packaged and labelled for multiple applications, and a drawing provided, to make on-site installation as easy and clear as possible.

## Features

- Custom fit to any application using available fittings.
- Standard rail sizes include 1.66" OD, or 1.90" OD.
- Finishes include powdercoated safety yellow, galvanized, or aluminum.
- Can be pre-cut and labelled if required for custom applications where materials cannot be cut on site.
- Small and compact to ship.
- 6' lengths of pipe are standard, custom lengths available upon request.
- Safety Rails can be installed onto concrete floor or steel deck with the proper fasteners.
- Available in pre-set kit sizes or pipes and fittings can be purchased separately as required.
- Meets/exceeds OSHA and IBC standards.
- Aluminum fittings and tube are lightweight and corrosion resistant.

Modular, easy to assemble design

## Popular Fittings

90 Degree Elbow

Short Tee

Long Tee

Railing Base Flange

3-way Blind Corner

3-way Open Corner

Short Cross

Straight Sleeve
