

## PS Doors - LSG Ladder Safety Gates - OSHA Safety Gate

LSG Ladder Safety Gates are self-closing swing-gates that are OSHA and ANSI compliant and adjust to fit your opening size. They are a great way to protect ladder ways, mezzanines, elevated platforms, or anywhere there is an opening in your guardrails. Many of our customers are replacing their old chains that were used to 'protect' openings with these gates, that meet the loading requirements for passive fall protection.

### Available finishes include:

- Powder coated Yellow (PCY)
- Hot Dipped Galvanized (GAL)
- Stainless Steel (SS)

Safety Gates have been a proven and effective way to address fall hazards. Typical areas that are addressed by safety gates are the tops of access ladders, crossover and platform openings, pedestrian access walkways and dock loading staircases. The self-closing feature insures that gates are closed automatically thereby ensuring safety at hazardous areas.
