

SafeMezz360

SafeMezz360 is the latest fall-protection product for keeping personnel safe during the important, but potentially hazardous job of loading and unloading fork-lifted materials to and from your mezzanine. SafeMezz360 complies with OSHA and ANSI fall protection standards, including the strict ANSI MH28.3 Section 6.4.3 requirement. For warehouses with elevated mezzanine edges, SafeMezz360 creates a safe and secure enclosed area to keep your workers safe. It's available in single or double pallet widths.

Features:

- Slam-proof dampening system protects workers from dangerous and noisy slamming
- Industrial chain and sprocket system built for repeated use
- Durable 2" nylon rollers and track system allow for easy single-handed operation
- 42" high gate and mid-rail meet standards for OSHA Fall Protection Safety Railings
- Toeboard is OSHA compliant
- Counter-balanced gate system provides continuous edge protection
- Easy one handed operation: the gate opens and closes smoothly due to the 2" nylon rollers and track system

Note: We can also offer other products and solutions to mezzanine issues. Pivot gates, clear height, double swing safety gates are all typically used in material handling facilities.

Product Number	Clear Opening Height (A)	Overall Height (B)	Clear Opening Width (C)	Overall Width (D)	Clear Depth (E)	Overall Depth (F)
