

GrabSafe

The ladder GrabSafe system is now available in Canada! It adds horizontal grab-bars to the top step-through area of the ladder allowing a much more secure way to use the ladder where the regular rungs end. It consists of 2 grab-bars, one per side of the ladder and can be welded or bolted-on to the ladder and is available in a variety of finishes. We distribute this product to Canadian customers as well as USA customers. The grab-bars each feature 3 rungs, and are approximately 26" in length. Also available as a portable option to use with stepladders.

Features include:

- Large rungs to continue ladder grips above ladder.
- Powder coated yellow, or unfinished raw steel available.
- Bolt-on or weld option for installation.
- Fits flat ladder rails up to 3" wide sidebars.
- Includes hardware for installation.
